

DELIVERING EXCELLENCE,
CREATING VALUE

Greenfield Oil and Trading Services Pvt Ltd.

ABOUT

Greenfield Oil and Trading Services (GOTS) Pvt Ltd was established in 2014 as a consultancy firm for Oil and Gas related engineering & design. We enhanced our reach from Indian Sub-continent to SEA and US sectors In recent years. Increased our portfolio in developing customized and specialized Software / IT solutions within Oil and Gas industry. With a vast experience of our consultants and advance algorithm experts, GOTS brings a unique blend of Technology and Innovation

VISION

- **Constant drive to deliver cost effective solution**

Engineering solutions from Subject Matter experts at optimized time and cost

- **Creating Innovations**

Merged with unique IT solutions to establish effective & innovative framework.

- **Collaboration**

Association with experts & consultants across globe to deliver timely results.

SERVICES

1. OIL AND GAS CONSULTANCY

Our experience team across the globe provides the effective solutions from subsurface to surface facilities.

Our dedicated consultancy fields are:

- **Well Design**

Drilling as well as Completion design

- **Stimulation Design**

Hydraulic Fracturing and Sandstone/ Carbonate acidization

- **Sand Management**

Sand Control selection, sand management guidelines & rock-mechanic model

- **Reservoir & Geosciences**

Material balance, Reserve estimates, FDP consultancy

- **Petroleum Economics**

Field commercialization studies, Brownfield/mature assets regeneration and more

- **Field Rejuvenation**

Plan the whole FDP from drilling to hookup.

Scope of work: -

- Handle **turn key** projects in drilling & production – Assigning a multi-disciplinary team of technical experts to deliver projects
- Identify the **potential problems** and gaps within processes providing necessary solutions and recommendations
- Analyze the problem and provide **calculative assessment** along with **design analysis**.
- **Bid evaluation process** -Ability to define scope of work, tendering and technical evaluation till award of contract -

2. ENGINEERING SOFTWARE DEVELOPMENT

Customized oil and gas software application to enhance your efficiency and standardize processes

- **Customized Software**

Develop customized software as per client need at optimized cost and in coordination with our Technical experts in Oil and Gas

- **Specialized software**

Develop our own software's to fill the gap in oil and gas industry e.g. **SandMaster**

- **Integrated Solutions**

Reporting tool to consolidate data from various sources at one place

- **Data Ware Housing and Analytics**

Dedicated experts in data science & analysis to facilitate Collection of large number of big data further decode it analyze and interpret it for better prediction and optimization

3-ON- SITE SUPPORT

Our pool of Engineers and Technicians are available for an onsite support and supervision for rig and non-rig operations.

Strategies

- Study all applications
- Interview shortlisted candidates
- Demobilization/Mobilization
- Provision for accommodation and medical facilities
- Ensure prompt payment of contract staff

OUR PRODUCTS

SandMaster

Your Solution to manage sand

- Sand Management System and Tools For **Evaluation** of **Risk** & developed on a **patented** algorithm & **unique** equations
- Industry's first software dedicated on **Sand Management** enabling a complete solution from sub-surface to surface
- Comprising of erosion, deposition, multiple particle size and **4-phase flow** studies including operate envelopes for a risk-free operation of facilities to meet HSE compliance

Upcoming Products

- **GeoMaster** - With capability of sand control **selection** and **design**, Sand management strategy making and related project **economics** and **Rock mechanical stability** for field life
- **FracMaster** - Frac related **risks modelling**, Perforation **erosion** modelling, ensuring equipment robustness and integrity during frac pump and **flowback** operations

WHY US?

- **Global Pool of Consultants**
Our experience team all across the globe provides the effective solutions from subsurface to surface facilities
- **Customization of IT solutions**
We provide customized software with engineering solutions in order to meet the client requirements
- **Cost Effective Engineering Solutions.**
We track various economic parameter to optimize your cost and save time to provide optimum solution
- **Onsite Support**
We provide **skilled** oil and gas professionals on contract and permanent basis
- **Safety First**
We first consider the **safety** whatever the **product** and **services** we deliver.
